If you need single trip permits, have annual permits or long-term routings, you may contact this office for alternative routing. This office has had numerous complaints about over-dimensional loads entering construction zones, thereby putting at risk employees of this department, contractor's personnel, and the general public as well as destroying traffic control devices in these areas. The Department of Transportation will not tolerate these actions. Please be advised that movement of over-dimensional vehicles larger than those specified in this letter through the above-mentioned areas is unlawful. This Department may refuse to issue, or may cancel, suspend, or revoke the permitting privileges of an applicant or permittee who is observed in these sections of the highways.
