Roadway Embankment Transition at Bridge Ends

3:1 & 4:1 Slopes to 2:1 Bridge End Embankments

**GENERAL NOTES**

1. A 100' Transition is the desired minimum if length of need used leaves less than 100', use remaining available length to the 3:1-2:1 transition station.

2. Use 50' Transition for embankment fill heights of 15' or less and one for embankment fill heights greater than 15'.
