

Online and In-Person Public Involvement Notice

HSIP-0167(514), PIKE COUNTY

Constructing a Roundabout at the Intersection of AL-167 and AL-87

PROJECT DESCRIPTION

The Alabama Department of Transportation (ALDOT), in collaboration with the Federal Highway Administration (FHWA), is proposing the installation of a roundabout and the implementation of access management techniques at the intersection of AL-167 and AL-187. The area experiences a high traffic volume and many crashes. The proposed modifications to the roadway are designed to improve the flow and safety of traffic. The current plans convert the intersection into a peanut-shaped roundabout to make the intersection safer and easier for traffic to operate.
