Access Management Study on AL-6 (US-82)  
from Old Jug Factory Road to Eoline Road

The Alabama Department of Transportation (ALDOT) is performing an access management study on AL-6 (US-82) corridor from Old Jug Factory Road to Eoline Road in Tuscaloosa and Bibb Counties.

Information about the project is available to the public for review and comment.

Your comments may be provided by US mail, email, voicemail, or online as described below.

Comments for the study must be submitted by **February 8, 2024**.

### Project Description

The purpose of this project is to develop an access management plan along the AL-6 (US-82) corridor that will preserve the functional integrity and capacity of the roadway while reducing conflict points that degrade the roadway's safety performance and meeting the needs of the traveling public.

This project proposes the closure of median openings, restriction of turning movements, and construction of turn lanes. There are 94 existing median openings along the twenty-one (21) mile corridor. Of these existing median openings, 47 are proposed to be closed, 4 are proposed to be modified with restricted turning movements, and 2 are proposed to have their location slightly adjusted. Additionally, 3 new median openings are proposed for the corridor.
