RCC expansion project progresses; Work Zone Awareness begins next week

MONTGOMERY, Ala. – The Alabama Department of Transportation would like to thank motorists in and around Dothan for their continued patience with the expansion project on Ross Clark Circle.

The third phase of the expansion project consists of installing additional lanes on Ross Clark Circle from south of Meadowbrook Drive South to North Cherokee Avenue and on U.S. Highway 231 from Girard Avenue to Buyers Drive.

As part of this phase of the project service roads will be built along Ross Clark Circle from Meadowbrooke Drive South to prior to Montgomery Highway (U.S. Highway 231).

A video to help explain the new service roads is linked below.

With National Work Zone Safety Awareness Week beginning April 17, ALDOT reminds the traveling public to drive the posted speed limit and be aware of people and equipment while driving through a work zone. People working in an active work zone are the most vulnerable to serious injury.

The previous two phases have added lanes on Ross Clark Circle from south of Bauman Drive to south of Meadowbrooke Drive and on U.S. Highway 84 from Bel Aire Drive to North Englewood Avenue.

As part of the second phase of the project, a triple left turn from Ross Clark Circle onto U.S. Highway 84 West was also installed. The triple left turn allows more traffic to move more efficiently off Ross Clark Circle and onto U.S. Highway 84.
