STATE OF ALABAMA HIGHWAY DEPARTMENT

1409 COLISEUM BOULEVARD MONTGOMERY, ALABAMA 36130

February 5, 1991

CONSTRUCTION INFORMATION MEMORANDUM No. 1-91

TO: Division Engineers

FROM: William J. Hartzog
Construction Engineer

Wm J. Hartzog RAJ

RE: Stakeout of Highway Lighting Systems

In order to get maximum benefits from highway lighting systems projects, it is frequently necessary to adjust the actual location of the lights from the plan locations. Additionally, field features often affect the layout of the lighting. Design requirements and lighting equipment limitations place tight restrictions on the amount of allowable adjustment.

On all future projects containing highway lighting, excepting lighting done in conjunction with traffic signalization, we ask that you coordinate the final layout of the proposed lighting with the State Electrical Engineer's office. Mr. Paul Watson's office will need to review the field staking of the plan layout prior to the contractor being allowed to proceed with procurement of materials and/or construction activities. Mr. Watson should be contacted directly in coordinating this field review.

We will appreciate your cooperation in this matter.
