State Construction Engineer

RE: Section 600 – Mobilization Payments

Subarticle 600.04(a) of Special Provision (SP) 12-1799 dated August 1, 2016 addresses partial and final payments for Mobilization. This office has recently received a few inquiries requesting clarification of the Special Provision's intent regarding the final payment when the Contractor's bid for Mobilization exceeds 12% of the contract amount.

Prior to SP 12-1799, when the Contractor's bid for Mobilization exceeds 12% of the contract value, the final payment for Mobilization was not to occur until the final estimate. SP 12-1799 allows the final payment for Mobilization to occur once all work is complete and the project has been accepted for maintenance. This SP and modification in final payment for this item may be allowed on projects let prior to August 1, 2016. These projects will be reviewed by the Construction Bureau on a case by case basis dependent on delays with the processing of the final estimate and when requested from the Region/Area.

Please ensure that your Project Managers are familiar with this CIM.
