RE: Materials Write-up for Resurfacing Projects

Please be advised that a materials write-up will be required for jobs that are listed under the maintenance category and involves Federal funds. Where the total estimated cost exceeds a million dollars and the resurfacing will be done on the National Highway System, a write-up will be required. If the resurfacing is not on the National Highway system, a write-up will not be required even if the total cost exceeds one million dollars. Where the total cost is less than one million dollars, a materials write-up will not be required on any resurfacing job whether it is on the National Highway System or not.

Attached you will find a map showing the National Highway System as currently approved by FHWA in Alabama. Our understanding is that this may change in the future.
