Area Construction Engineers

From: 
George H. Conner, Deputy Director - Operations

Reference: ARTBA Safety Awareness Training Class

Dear Region Engineers and Bureau Chiefs:

ARTBA Safety Awareness Training Classes

In an effort to protect our workers and promote safety awareness, ALDOT has made arrangements with ARTBA (American Road and Transportation Builders Association) to provide a Safety Awareness Training Class for our employees. This training is designed for employees with duties that require them to work in or around live traffic or within any highway right-of-way (including but not limited to maintenance, construction, drilling, testing, surveying, etc) and any employee with duties that require the use of, or work in the vicinity of, any power equipment (building maintenance, groundskeeping, loading dock operation, shop activities, etc).

The ARTBA trainers will be covering a wide range of topics including run-overs and back-overs, internal traffic control, blind spots (with truck demo), and fall protection. Classes will be 4 hours long with one session in the morning starting at 8:00 am and a second session in the afternoon starting at 1:00 pm.

All employees are encouraged to register for this class. Your employees described in the first paragraph are to select a session and sign up with their Area or Bureau Training Coordinator as soon as possible.

Listed below are the dates the Safety Awareness Training will be held for each Area and the Central Office.

Location	Session #	Date	Time	Location	Session #	Date	Time
