

Tack Coat

Type of Construction	Material	Test	Frequency of Acceptance Samples and Tests for Job Control	Construction Stages for Obtaining Sample or Test	Sample Size	Procedures		Remarks
						Sampling Method	Test Methods	
Tack Coat	Liquid Bituminous Material or Emulsified Liquid Bituminous Material	Analysis	See ALDOT-243. For projects including 800 gallons or more sample tank once per material per job. For all projects sample the tank when plant has been idle for an extended period of time, or has used different paving grades of asphalt material, or has not received BMT-146 for shipments.	Before incorporation in work	1 qt (1 L) for Performance Graded Asphalt Binder (PGAB). 1 gal. (4 L) for emulsified asphalts	AASHTO T-40		Ship to Central Laboratory. Use metal cans for Liquid Binder. Use plastic containers for emulsified asphalts. Sample information card Form BMT-1. If contamination is suspected, sample as required by Engineer
		Temperature Correction Application Rate	See Construction Manual for frequencies, methods, and reports					BMT-4
